

# Bilag til opgave 2

**Figur 1: Atmosfærens strålings- og energibalance:**

© Otto Leholt – efter Hugues Goosse (2015)

**Figur 2: Temperatur og atmosfærens CO<sub>2</sub>-koncentration gennem 400.000**

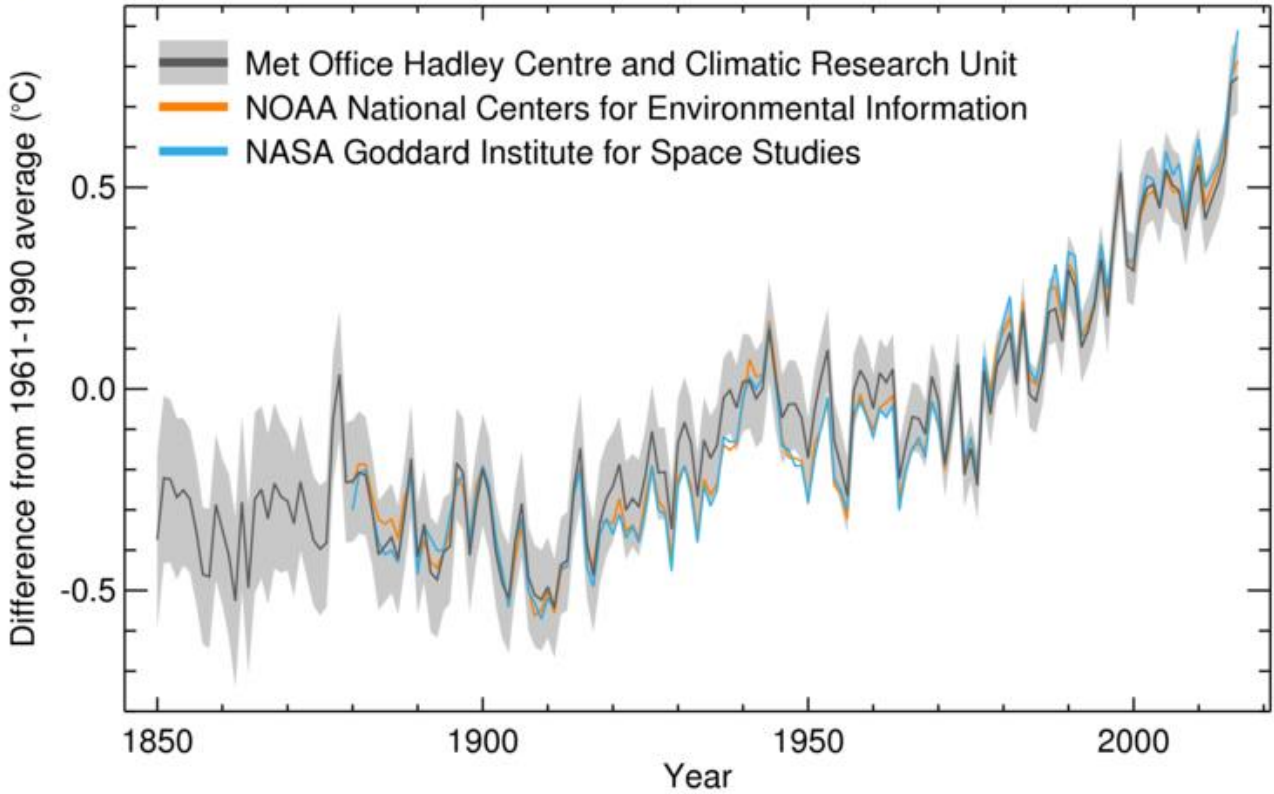

Source: J.R. Petit, J. Jouzel, et al. Climate and atmospheric history of the past 420 000 years from the Vostok ice core in Antarctica, Nature 399 (3/June), pp 429-436, 1999.

Figur 3: Den globale gennemsnitstemperaturs afvigelse fra

### Global average temperature anomaly 1850 - 2016

Figur 4: Atmosfærens CO<sub>2</sub> koncentration fra 1958-2019

Latest CO<sub>2</sub> reading  
May 11, 2019

**415.26 ppm**

Carbon dioxide concentration at Mauna Loa Observatory
